

# VESTIBULES

## INNOVATIVE ENTRY SAFETY AND COMFORT

Innovative Space Management Solutions (ISMS) offers entry vestibules that create a safe, secure, and weather-resistant buffer zone at facility entrances. Our modular vestibules are designed for access control and climate regulation, and they can be fully customized to integrate seamlessly into your existing structure.

Whether you require a security vestibule to verify personnel entry or a climate-controlled entrance vestibule to minimize energy loss, our prefabricated solutions ensure fast installation with minimal disruption.

## FEATURES

- **Heavy-Duty Steel Frame Design:** Constructed for durability and long-lasting performance.
- **Custom Designs and Layouts:** Engineered to complement existing architecture.
- **Weatherproof Construction:** Designed to protect against wind, rain, and temperature fluctuations.
- **Color-Matched Paint Options:** Available in various finishes to seamlessly blend with the surroundings.
- **Prefabricated for Quick Installation:** Shipped either pre-assembled or in modular components for easy setup.
